## Quiz #2

*Application Support | Winter 2014-2015 | Jim Rudolf*

1. If directory `MyFiles` is not empty, I cannot delete it with the `rmdir` command. What is a complete command to delete the directory `MyFiles`, whether it is empty or not?

\_\_\_\_\_

2. We can use the `ps` command to list running processes. a) How are the processes sorted? b) When is it better to use the `top` command, which also lists running processes?

a) \_\_\_\_\_

b) \_\_\_\_\_

3. True or false?

\_\_\_\_\_ The `-r` option of the `ls` command results in a recursive directory listing.

\_\_\_\_\_ If files `foo1.txt` through `foo100.txt` exist in the current directory, then the command `ls foo?.txt` will list `foo1.txt` but not `foo12.txt`.

\_\_\_\_\_ Using the `touch` command on an existing file will overwrite the file's contents.

\_\_\_\_\_ The following is an illegal name for a directory: `summer_vacation.jpg`

4. Oops... I just deleted Very Important File `~/report.odt` by mistake. The shell has no trashcan, but luckily I copied the file to my `~/backups` directory yesterday. Write a complete command to restore (copy) the file back to my home directory. I am currently in my home directory.

\_\_\_\_\_

5. Briefly, what do these two commands do: `apt-get update` and `apt-get upgrade`?
